
Insuletics Limited

**Corporate Environmental
Policy Statement**

Policy 1
Appendix 1
Issue 2
Date November 2014

Approved by: Ian Coates

It is the policy of Insuletics Ltd to minimise the potentially significant impacts of our operations and services on the environment. We will promote sustainability and environmental awareness at all levels of decision-making.

In defining our programme of improved environmental performance, pollution reduction, and global climate change mitigation we will:

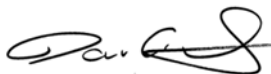

1. Comply with the letter and spirit of all relevant environmental legislation,
2. Adopt a robust and measurable purchasing program with Insuletics Supply Chain Partners that takes into account the environmental and climate change impact of products and services procured by Insuletics Ltd.
3. Implement waste management strategies that promote waste minimisation, re-use, recovery and recycling where appropriate. Where these options are not available, we will ensure that our waste is disposed of in a way that minimises its impact on the environment.
4. Incorporate energy efficiency measures into building design and promote efficient energy use in all areas of business activity.
5. Seek to manage and reduce internal and client-facing travel.
6. Ensure that our staff are aware of the environmental impacts of their work activities and encourage them through awareness raising and training to minimise those impacts.
7. Pursue a programme of continuous improvement of our policies and practice.
8. Ensure that our Policy is available for public review on request.

This policy will be reviewed on a regular basis to evaluate continued relevance and to monitor compliance

Date: 3 November 2014
